

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

In the claims:

A complete listing of claims follows:

1.-100. (canceled)

101. (currently amended) A table game system, comprising:

- (A) a gaming table having a plurality of player positions configured to provide a surface for players to place wagers and play a game;
- (B) a table display device positioned to be viewed by players playing at the gaming table and configured to present information to players;
- (C) a ~~plasma~~ controller in communication with the table display device;
- (D) a video source, the video source configured to provide video information for a plurality of presentations;
- (E) a tuner in communication with the video source and the ~~plasma~~ controller, the tuner configured to receive video information and transmit selected video information to the plasma controller;
- (F) a table management system computer in communication with the ~~plasma~~ controller, the table management system computer configured to interface with a system operator and to schedule presentations on the table display device;
- (G) a table interface device configured to allow a dealer to input information;

- (H) a movably mounted player interface device having buttons configured to allow a player to electronically input information provide a player selected input during a bonus game displayed on the table display device;
- (I) a machine interface device in communication with the player interface device, the machine interface device configured to ~~received~~ receive information input: into the player interface device;
- (J) a polling unit in communication with the plasma controller, the table interface device and the machine interface device, the polling unit configured to manage and arbitrate communication between the plasma controller, the table interface device and the machine interface device;
- (K) wherein the ~~plasma~~ controller is configured to receive information from the polling device, table management system and tuner and cause the table display device to display a plurality of different kinds of presentations, the presentations comprising:
 - (a) an entertainment presentation intended to entertain players playing at the gaming table; and
 - (b) a bonus game presentation configured to present information related to a bonus game; and
- (L) wherein a dealer may cause the table display device to display the bonus game presentation by inputting information into the table interface device, the table interface device transmitting information to the polling unit which in turn

transmits information to the ~~plasma~~ controller, the ~~plasma~~ controller then causing the table display device to display the information related to a bonus game.

102. (previously presented) The table game system of claim 101 wherein the presentations further comprise an advertisement presentation.
103. (previously presented) The table game system of claim 101 wherein the presentation further comprises a banner presentation.
104. (previously presented) The table game system of claim 103 wherein the banner presentation comprises scrolling text.
105. (previously presented) The table game system of claim 103 wherein the banner presentation comprises a bitmap image.
106. (previously presented) The table game system of claim 101 wherein a player may make a selection related to the play of a bonus game by inputting information into the player interface device.
107. (previously presented) The table game system of claim 101 wherein the entertainment presentation is a sporting event.
108. (previously presented) The table game system of claim 101 wherein the plasma controller comprises a storage device configured to store presentation information and the plasma controller is configured to retrieve presentation information from the storage device and transmit the information to the table display device.
109. (currently amended) The table game system of claim 108 wherein the table management system is configured to determine if the ~~plasma~~ controller has a isle stored on the storage device that is to be used in a presentation.

110. (currently amended) The table game system of claim 109 wherein if the ~~plasma~~ controller does not have the file to be used in the presentation, the table management system is configured to transmit the file to be used in the presentation to the plasma controller.
111. (currently amended) The table game system of claim 101 wherein the table management system is configured to receive scheduling and content information from an operator and to cause the ~~plasma~~ controller to display presentations in accordance with the scheduling information and content.
112. (currently amended) A table game system comprising:
- (A) a gaming table means for providing a place for players to place wagers and play a game;
 - (B) a table display device means for presenting information to players;
 - (C) a ~~plasma~~ controller means or controlling the display of information on the table display device;
 - (D) a video source means for providing a plurality of presentations;
 - (E) a tuner means for transmitting selected presentation information to the plasma controller;
 - (F) a table management system means for allowing a system operator to schedule presentations on the table display device;
 - (G) a table interface means for allowing a dealer to input information;
 - (H) a movably mounted player interface means for allowing a player to input information;

- (I) a machine interface means for transmitting information input into the player interface means to the plasma controller means;
 - (J) a polling means for managing and arbitrating communication between the plasma controller, the table interface device and the machine interface device;
 - (K) wherein the plasma controller is configured to receive information from the polling means, table management system means and tuner means and cause the table display device to display a plurality of different kinds of presentations, the presentations comprising:
 - (a) an entertainment presentation intended to entertain players playing at the gaming table;
 - (b) a bonus game presentation configured to present information related to a bonus game;
 - (L) wherein a dealer may cause the table display means to display the bonus game presentation by inputting information into the table interface means.
113. (currently amended) The table game system of claim ~~[[101]]~~ 112 wherein the presentations further comprise an advertisement presentation.
114. (currently amended) The table game system of claim ~~[[101]]~~ 112 wherein the presentation further comprises a banner presentation.
115. (currently amended) The table game system of claim ~~[[103]]~~ 114 wherein the banner presentation comprises ticker tape scrolling text.
116. (currently amended) The table game system of claim ~~[[103]]~~ 114 wherein the banner presentation comprises a bitmap image.

117. (currently amended) The table game system of claim ~~[[101]]~~ 112 wherein a player may make a selection related to the play of a bonus game by inputting information into the player interface device.
118. (currently amended) The table game system of claim ~~[[101]]~~ 112 wherein the entertainment presentation is a sporting event.
119. (currently amended) The table game system of claim ~~[[101]]~~ 112 wherein the ~~plasma~~ controller means comprises a storage means for storing presentation information.
120. (currently amended) The table game system of claim ~~[[108]]~~ 119 wherein the table management system means is configured to determine if the storage means has a file that is to be used in a presentation and if the ~~plasma~~ controller means does not have the file to be used in the presentation, the table management system is configured to transmit the file to be used in the presentation to the ~~plasma~~ controller means.
